36	SIZE 36	36	22.5
			21.4

Check with a ruler that this reference measures exactly 10 cm.

earthies

ORIGIN size sheet

EU 36 to 45 · 1:1 scale · works for both feet

1 **Print** at 100 %, with no page scaling, and check the 10 cm reference.

2 **Place** the sheet on the floor with the bottom edge of the paper against the wall.

3 **Stand** on it barefoot, heel against the wall and foot centred on the dotted line.

4 **Read** the band where your longest toe ends: that number is your size. Each band already includes the room your toes need.

5 **If your toe lands exactly on a line,** choose the size above it, the larger one.

6 **Repeat** with the other foot and keep the larger size.

Not sure? Read the cm on the side of the bands and type them into the calculator at earthiesbrand.com/en/pages/guia-de-tallas.
